

ViaVienté

Why ViaViente is Real Food

ViaVienté is one of the only juice products on the market to actually be classified as Real Food! This means all the ingredients are WHOLE ingredients, not concentrates, and ViaVienté is processed with Aseptic Sterilization, a 4 SECOND heating and cooling process that maintains the delicate chemistry of each ingredient while making the product safe from viruses, bacteria and molds and allowing ViaVienté to be 100% preservative free!

Jae Sabol has this to say about Via:

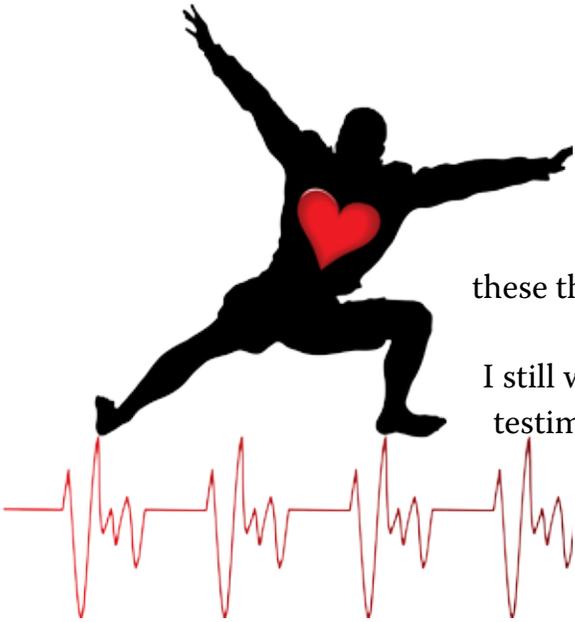

“With 15 years experience in the health industry I’d given up on the supplement industry and all the juice products 10 years ago choosing to eat a 90% organic diet and juice my own fruit and vegetables instead. Every time a product was introduced to me it was the same issues over and over again... added sugars, pasteurized, preservatives, added flavors, synthetic ingredients, concentrates... I don’t even consider consumables like this food.

Then someone brought me ViaVienté. I still wasn’t convinced when they told me it wasn’t pasteurized and was all whole food ingredients, so I did my own research. First I wanted to see if what they said was really true and second I wanted to see if there was anything else out there like this product.

What I found, confirmed what I already knew was true about the supplement and superfood industry: a product like this is unique. I couldn’t find a single product that competed in more than three of the 7 major areas that ViaVienté distinguished itself: 95% absorption rate... which I did the layman’s ‘consume a lot and see how much you pass in your urine’ test to confirm, not pasteurized... something almost unique in the industry and hugely important, quality assurance, no added sugars or flavors, no preservatives, and utilization of the whole fruit for ingredients... also almost unique in the industry.

ViaVienté

In addition, ViaVienté includes a chelated mineral complex and grows all of its ingredients in one of the healthiest places on earth with no pesticides or herbicides and tests the end product for residues... all these things made me willing to TRY the product.

I still wasn't sold. Via seemed expensive unless all the 'miracle testimonials' were true, so I wanted to try it for myself and with my clients. What happened was a complete shock, I found my energy levels improved, my cognitive function improved, and my workout recovery and sleep also improved! My client's got similar results.

ViaVienté, as a living whole food... real food. This product has convinced me for the first time that science has produced a superfood product that cannot be duplicated by the average consumer and will add to even the healthiest of diets."

Jae Sabol has 15 years experience as a Holistic Health Professional. He is a Licensed Massage Therapist, Neuromuscular Therapist and Certified Corrective Holistic Exercise Kinesiology (CHEK) Practitioner and Holistic Lifestyle Coach. Jae is also certified by the National Academy of Sports Medicine, National Sports Sciences Association and has taught for the National College of Exercise Professionals.

Jae has worked with such notable names as 2 time Olympic Swimmer and World Silver Medalist Gabrielle Rose, Olympic Volleyball Player and World Champion Nicole Branagh, Volleyball Champion Mike Lambert, LPGA golfers Anna Rawson and Pearl Sinn-Bonanni, pro surfer Leo Nordine, Pro Skateboarder Rick Howard, professional tennis players, fighters, bodybuilders and more... all of whom he recommends taking ViaVienté!
